Profile

Lead Frontend Engineer with 12+ years of experience delivering scalable, high-performance web applications using React, Redux, Next.js, TypeScript, Node.js, MongoDB, and modern JavaScript. Proven ability to build and lead enterprise-grade UI platforms across network automation, media streaming, and cloud-based systems. Experienced in owning complex frontend architectures and driving full-stack products from concept to production. Strong focus on performance, usability, and long-term maintainability. Founder of *Save Time - Focus & Block Distractions*, a Chrome extension designed to help professionals reduce digital distractions and improve workday productivity.

Employment History

Senior Software Engineer 4(TL) , Juniper Networks, Bengaluru

AUG 2021 – PRESENT

Lead frontend for Juniper Paragon Automation, a cloudnative suite that automates complex network operations.

- Directed a squad of engineers, set UI architecture standards, mentored peers, and enforced high-quality code through reviews.
- Designed a managed/unmanaged device model with selective “Manage” binding to protect plan integrity and streamline workflows.
- Owned delivery of missioncritical modules including Blackhole Detection, Traffic Engineering, and Network Planning.
- Built an integrated SSH console and comprehensive audit logging to strengthen operability and compliance.
- Optimized performance with lazy loading, code splitting, and treeshaking, reducing initial payload and speeding navigation.
- Implemented advanced topology editing (node/link operations) to improve network modeling and efficiency.

Tech: React, Redux, TypeScript, Node.js, HTML, CSS, JavaScript, Jest, React Testing Library

Senior Front End Engineer , Ericsson, Santa Clara, Bengaluru

MAR 2018 – AUG 2021

Contributed to MediaKind (Ericsson) OTT and video delivery platform across live, VOD, parental controls, and personalization.

- Owned user-facing features including Download-to-Go, Parental Controls, and Settings with emphasis on reliability and UX.
- Developed VOD and Live TV modules enabling rent, play, record, favorite, and surfacing upcoming events.
- Designed a unified data layer with caching to streamline data flow and reduce network chatter.
- Supported on-call rotations, participated in design reviews and bug-bash initiatives to improve release quality.
- Mentored teammates and coordinated delivery to meet scope and timelines.
- Identified and removed performance bottlenecks to improve responsiveness and load times.

Stack: React, Redux, TypeScript, Node.js, HTML, CSS, JavaScript, Jest/RTL

Senior Web Developer, Aricent, Bengaluru

JUL 2017 – FEB 2018

Built web applications for IKEA Cloud at Home and Microsoft Xbox, integrating global store data and custom workitem logic.

- Developed a locationaware chatbot to deliver localized answers and improve engagement.
- Applied crossbrowser/crossplatform practices to expand compatibility and stability.
- Created responsive UIs and integrated REST APIs in close collaboration with backend teams.

Tech: Angular, JavaScript, HTML, CSS

Web Developer, TCS, Bengaluru

JAN 2013 – JUL 2017

- Contributed to the Online Integrated Project Resource Application, dynamically calculating estimates based on bill rates using JavaScript and JSON.
- Refactored client-side validation, reducing dependencies and improving application stability.
- Conducted user testing and implemented feedback to improve user experience.

Technologies Used: JavaScript,HTML,CSS,

Education

B-Tech(CSE), Asansol Engineering college

AUG 2008 – JUL 2012

Accomplishments

- Star of the Month - Juniper Networks
- Star of the Month - Ericsson
- ACE Award -Ericsson -Employee of the Quarter
- Star of the Month - TCS
