Employment History

Senior software engineer 4, Juniper Networks, Bangalore

AUGUST 2021 – PRESENT

Juniper Paragon Automation is a modular portfolio of cloud-native software applications that help operators to simplify their network operations by eliminating manual tasks, processes, and workflows that are often repetitive and prone to human error.

- Have implemented an ssh terminal shell to connect with the router IP and the user can use arrows up, down, exit, clear, and tab to check the command result.
- Manage topology-related changes [for example, add, modify, and delete nodes, links, and point-to-point label-switched paths]
- Implemented Inventory reports provide details of the hardware inventory (such as devices, device parts, line cards, and so on) in the network.
- Have taken ownership of black hole, traffic engineering, and network planner module and do the code review on a daily basis, focusing on performance, and scalability.

Senior Front End Developer, Ericsson, Bangalore, SantaClara

MARCH 2018 – AUGUST 2021

MediaKind is a cloud-based TV platform that will give the Industry end-to-end media processing, live content, VOD, parental controls, and better streaming playback quality. We have created one tool called a UX tool where you can customize your site.

- Working in the On-Demand, Live TV show component, where the customer can rent/play/record/favorite the asset, and view the upcoming events.
- Taken ownership of Chrome cast, Download and Go, Parental control, Profile, and Settings, and recording module. Leading the Chrome cast team to deliver the feature epic to the team as a developer. Created a mini and expanded controller of Chrome cast in our application where users can control volume, play, pause, skip the progress bar, rewind, and so on.
- Created a data layer called UDL (Unified Data Layer) where cached is maintained, had set the maximum age for the data layer, and upon on data sources, it will be loaded again.
- Get involved in on-call support, build, design, and bug bash teams to improve the quality of the product.
- Created reusable React components and managed application state with Redux.

Front End Web Developer, Aricent, Bangalore

JULY 2017 – FEBRUARY 2018

IKEA cloud at home" application is used to show the list of mobile application details like there are so many IKEA stores whole over the world, so they can create their own application and upload the details in our application. The application for "Microsoft Xbox" will provide the custom logic with the details of the work item which is raised in VSO and track the details and MS internal people can create a new VSO work item.

- Identify and capture business rules and business requirements

- Created one chat-bot which will take the user's current location and based on that it will find out the list of local stores and bind with Google map through Google action.
- Adopted a cross-browser and cross-platform approach to make the website more versatile and Supportive.
- Been an active team player, helped in fixing bugs, and also carried out troubleshooting.

Web Developer, Tata Consultancy Services, Bangalore

JANUARY 2013 – JULY 2017

On-line integrated PRM Application is an Integrated Project management tool that allows the Project manager to manage Resources, Define & Manage bill rates of a resource, define forecast for a resource, and manage estimates of a project.

- Developed all components and controls dynamically that calculates the estimates based on Bill rates using JavaScript and JSON.
- Refactored the **client-side validation** to decouple the UI and business logic, reduced dependency, and event listeners.

Education

B-Tech, Asansol Engineering college, Asansol

AUGUST 2008 – JUNE 2012

Accomplishments

Star of the Month - Ericsson

ACE Award -Ericsson -Employee of the quarter

Spot Award - Aricent

Star of the Month - TCS

Appreciation award - TCS(PM)

Publishing 5 times name in a famous Magazine in Mathematics Today by MTG For solving "Math Musing" problems monthly.

Additional Information

- Implemented Image rendering through Google log-in.
<https://images-render.web.app/>
- Implemented a buy-in burger site: <https://burger-78b6a.web.app/>
- Implemented a comment section like Facebook:
<https://commentwidgetabhijit.web.app/>

Extra-curricular activities

1. Founder of Group "iMpossible" Which is a bunch of members, which provides money/food items/books/other needs to children/homeless people who are, who are fighting with life.

<https://www.facebook.com/groups/185593181610038>

2. Reading books, playing guitar, writing blog for my site and medium website.
